

50. Smokeless tobacco: a silent killer

**THE 46TH UNION
WORLD CONFERENCE
ON LUNG HEALTH**

CAPE TOWN, SOUTH AFRICA
2-6 DECEMBER 2015

Saturday, 05 December 2015, 15:30 - 17:00

Ballroom East-Westin

Type of session	Symposium
Track	Tobacco control
Description	Smokeless tobacco (ST) consumption poses a public health problem affecting many populations in the world. Its use leads to a variety of cancers and cardiovascular diseases but despite this, ST remains a neglected issue. In many countries, such as those in South Asia, ST is the predominant form of tobacco use. Yet, efforts to control tobacco even in these countries have largely focused on cigarettes. In general, there is a global failure to appreciate the magnitude of the problem posed by ST amongst health professionals, policy-makers and funders, which results in limited progress in addressing it.
Target audience	<ol style="list-style-type: none"> 1. Tobacco control advocates, funders, researchers and policy-makers 2. Health policy-makers, and health service managers 3. Doctors, nurses and other health professionals
Objectives	<ol style="list-style-type: none"> 1. To highlight that ST consists of diverse products with differences in their cancer and cardiovascular risks 2. To show that ST poses a risk to human health and contributes to the global disease burden 3. To galvanise early efforts to develop and evaluate novel approaches to prevent and control ST
Keywords	Smokeless tobacco, chewing, cancer
Coordinator(s)	Kamran Siddiqi (UK), Rumana Huque (Bangladesh)
Chair(s)	Lekan Ayo-Yusuf (South Africa)
